

Environmental Quality Incentives Program
Indiana – 2006
11/8/2005

EQIP is a voluntary conservation program for farmers and ranchers that promotes agricultural production and environmental quality as compatible national goals. EQIP offers financial and technical help to assist eligible participants to install or implement structural and management practices on eligible agricultural land.

General EQIP Provisions

- CONSERVATION PLAN: All 2006 EQIP applicants will have an on-site visit completed *before* they are ranked. The client will develop a conservation plan in Toolkit on the acres being offered for application. Documentation will include a resource checklist (CPA-52) and list of conservation practices that the client has agreed to install for treatment if funded.
- APPLICATIONS: All 2006 applications will be entered in ProTracts and ranked using the National Ranking System. ProTracts will be used for all applications and contracting. Payment limitations, adjusted gross income (AGI), and producer eligibility must be checked at time of application to meet basic EQIP eligibility requirements. Applicants **MUST** prove control of the land for the contract period to meet basic eligibility requirements. Where an applicant is importing or exporting manure, they **MUST** provide a contract/agreement that shows the terms of the receiving or exporting for the life of the contract.
- CONTRACTS: EQIP contracts are written with a minimum term that ends one year after the implementation of the last scheduled practice, and a maximum term of ten years. Contracts must record the details of cost share and incentive payments for implementing conservation practices. Only practices being implemented with EQIP financial assistance are listed in the contract. Practices must be implemented according to NRCS technical standards.
- BUNDLING TRACTS: Multiple Tracts and farm numbers may be bundled for ranking and contracting. Ranking will be done in the county in which the producer signs up for the program.
- PAYMENT LIMITS: An individual or entity may not receive, directly or indirectly, cost-share or incentive payments that, in the aggregate, exceed \$450,000 for all EQIP contracts entered during the term of the current Farm Bill. The \$450,000 payment limitation will be checked in the ProTracts eligibility screen. Producers cannot receive a contract for more than the remaining balance of the payment limitation. The payment limitation can be reviewed in Fund Manager.
- SPECIAL GROUPS: Limited resource producers and beginning farmers and ranchers are eligible for higher cost-share rates. Cost share rates for all limited resource farmers will be set at 90% while rates for beginning farmers will be 15% greater than the established rate. Example: At a base rate of 50% a beginning farmer would receive 65%; at a base rate of 20% a beginning farmer would receive 35%.

- TECHNICAL ASSISTANCE: Farmers and ranchers may elect to use a certified Technical Service Provider for EQIP technical assistance. In order to be reimbursed the Technical Service Provider must be in TECH REG, and the technical assistance practice code must be in the contract prior to service being provided. Technical assistance will be paid on only the following practices. [Nutrient Management (590), Pest Management (595), Waste Utilization (633) and Comprehensive Nutrient Management Plan (CNMP) (100)]
- DETERMINING IF AN APPLICATION IS "LIVESTOCK": To be considered a livestock application, 50% or more of the cost-share/incentive total must be for livestock-related practices. In accordance with national guidance, 60% of EQIP allocations to the state will be awarded to contracts involving livestock. If the application is livestock it must be checked correctly in ProTracts for the correct livestock species.

2006 State Ranking Highlights:

- The national ranking process will be applied to all applications. This ranking system includes National, State and local priorities.
- For 2006, the state's specific resource concerns are: soil erosion, soil condition, water quality, air quality, plant condition, domestic animals and fish and wildlife concerns specific to Indiana.
- EQIP ranking will be based on an applicant's efficiency score. This score takes into account the degree of cost effectiveness, the treatment of multiple resource concerns, the use of practices that provide environmental enhancements for a longer period of time, and the magnitude of the environmental benefits resulting from treatment of National, State, and local resource concerns.
- The ranking process is part of the National ProTracts system, the NRCS contracting program.

2006 Local Ranking Highlights:

- Applicants will answer all questions. Points will be acquired based on the local ranking of resource priorities, number of priorities addressed and any priority areas designated by the local work group.
- The Local Work Group will identify their local resource priorities from the State list, with no more than two resource priorities chosen from any one category. Once the Local top ten (10) resource priorities are identified, the Local Work Group must then rank them in order of importance. The most important local resource priority will receive the highest ranking points and should be designated as #1, followed by the second most important as #2, etc.

Funding Highlights:

- All applications will compete for 2006 EQIP funds on a State wide basis. Counties will not be guaranteed any funded applications. The highest ranked applications as of the cutoff date will be offered funding. Any new applications received after the cutoff date and any non-funded applications will compete for funding in a second round. This procedure will be used until all 2006 EQIP funds have been awarded.

FY 2006 EQIP Schedule of Events

WHEN	WHAT	WHO
Oct. 31	<ol style="list-style-type: none"> 1. Instructions to promote deferred 05 applications that wish to continue. 2. Deferrals promoted by Nov. 10th. 	<p>Programs</p> <p>Field</p>
Nov. 7	<ol style="list-style-type: none"> 1. Bulletin to field with FY06 EQIP instructions 2. News release to public 3. Announce cutoff date for 1st Round funding. 4. Ranking and EQIP criteria posted to web. 5. Area begins Quality Assurance review process of rankings and plans as they are completed in ProTracts. 	<p>Technology & Programs</p> <p>Public Affairs Staff</p> <p>Public Affairs Staff</p> <p>Programs & Technology Staff</p> <p>Area Programs Specialists</p>
Nov. 9	<ol style="list-style-type: none"> 1. Statewide teleconference to review process 	Programs & Technology Staff
Jan. 13	<ol style="list-style-type: none"> 1. 1st Round cutoff date for all new applications signed between 12-17-04 and 01-13-06, and all deferred FY05 applications. These will be considered in 1st Round funding. 	
Feb. 15	<ol style="list-style-type: none"> 1. All plans and ranking finalized and in ProTracts on applications that were signed by Jan. 13th. 2. All QA reviews completed. 	<p>Field</p> <p>Area Programs Specialists</p>

	Additional rounds will be announced if funds become available for applications signed after 3-15-06	

Cost Share and Incentives for Conservation Practices

- Cost share rates and incentives for conservation practices are developed to promote positive conservation outcomes tailored to the environmental needs of Indiana. Cost share types for the 2006 EQIP program will be Average Cost (AC) and Actual Cost not to exceed a Specified Maximum (AM). Cost share type Flat Rate (FR) will be used for incentive payments. The maximum cost share rate for any AC or AM cost share type practice will be 50 percent. FY2006 EQIP cost share rates and provisions are in the following table.

Indiana 2006 Cost List

Practice Code	Practice Name	Component	Unit Type	Unit Cost	Cost Type	Share Rate	Specified Maximum Cost
560	Access Road	Access Road - One Way Traffic	FT	14.25	AC	50

Foot notes

(1) Cost shared only as an outlet for another EQIP practice.
(2) Cost shared only for livestock watering.
(3) Cost shared only for livestock watering or waste storage.
(4) This practice is capped at 25 acres per tract.
(5) Cost shared only for livestock water or wetland control.
(6) This practice must be installed in conjunction with a Riparian Forest Buffer to be eligible for cost share.
(7) Cost shared only as a component of another EQIP cost shared practice.
(8) If the storage facility is for a new operation or the expansion of more than 20% of the existing animal units, the cost share rate is 20%. A Comprehensive Nutrient Management Plan is required to be eligible for cost share for this practice (313). If cost share is requested for a waste storage facility at a site that has no animals but will be collecting and storing manure from another farm, then in order to be eligible the farmer must have a contract to receive manure at the site for the length of the EQIP contract. This practice requires on site engineering review and cost estimate by a NRCS Engineer.
(9) Water & Sediment Control Basin (638) requires the following three conditions to be met: 1) Practices 590 (Nutrient Management) and 595 (Pest Management) must already be implemented or implementation started within a year of the structure is being built. 2) Fields within the watershed of the structure must be managed to "T", or

practices must be installed in the year the structure is built that brings the soil loss to "T". 3) All conditions apply within the entire drainage area of the WASCOB, whether on the applicant's land or adjacent land. If these conditions are not met, practice 638 and component practices will not be cost shared.

Practices Eligible for Incentive Payments

Incentive payments may be paid up to 3 years. Exceptions are noted. Producers may only receive incentive payments for no-till, nutrient management and pest management one time. For example, producers who have received an incentive for these three practices in a previous contract are not eligible to apply for them on additional tracts or contracts. The purpose of an incentive payment is to enable a trial period for an on-farm management change to achieve a desired environmental outcome. Incentive caps apply to the client/producer; the client may not sign up additional farms or split applications to obtain additional incentive payments.

Practice Code	Practice Name	Unit
100	Comprehensive Nutrient Management Plan	ac

- ❑ A one time incentive payment of \$1,000.00 per CNMP implemented, to implement a CNMP.

100 CNMP - Comprehensive Nutrient Management Plan:

- ❑ CNMP's are required on a Waste Storage Facility (313) and Waste Treatment Lagoon (359) and must be completed prior to the installation of the facility or lagoon. Producers building a 313 or 359 are eligible for the CNMP incentive payment.
- ❑ CNMP's are not required on Composting Facility (317), Animal Mortality Facility (316), or Heavy Use Area Protection (561).
- ❑ Livestock producers not building a 313 or 359 and wanting to develop a CNMP on their operation are eligible for the CNMP incentive. Non-livestock producers receiving manure are eligible for the Nutrient Management or Waste Utilization incentives, but not the CNMP incentive or funds for a TSP to develop a CNMP. Non-livestock producers receiving manure as part of a contract can build a Waste Storage (313) for storing manure, must develop a CNMP and are eligible for the CNMP and nutrient/waste management incentives.
- ❑ By technical definition, a CNMP is a conservation system that is unique to animal feeding operations (AFO's). It should address all land units that the animal feeding operation (AFO) owner and/or operator owns or has decision-making authority over and on which manure and organic by-products will be generated, handled, stored or applied.
- ❑ For EQIP purposes, the CNMP is written/developed on all acres owned or under decision-making authority at that AFO (i.e. may not include ground 5 miles away that normally does not receive manure and rented ground not under long term contract). CNMP implementation is required on all acres identified to be receiving manure. At the minimum, the CNMP is developed and implemented on all tracts under contract,

including bundled tracts. The CNMP may identify additional acres not currently under EQIP contract will need to be added which could be done so with a contract modification.

- ❑ For EQIP purposes, an AFO that applies for 313/359 and hauls the manure offsite (i.e. poultry facility with only a few acres), must show control over the land where manure is applied to be eligible for the facility cost-share, CNMP incentive and any nutrient management incentives for the duration of the EQIP contract.
- ❑ Producers required to develop a CNMP must be informed of the CNMP requirements. Refer to the [NRCS AFO CNMP Handout](#), [IN NRCS CNMP Checklist](#) and the [IN NRCS CNMP Information Collection Checklist](#). See the [Indiana Agronomy web page](#) for additional information on CNMP requirements.

328	Conservation Cropping Rotation	ac
-----	--------------------------------	----

- ❑ Incentive payment of \$50/acre per year for cropland that is being converted to organic farming.
- ❑ Organic farming must meet the established USDA definition of organic farming.
- ❑ The incentive is capped at \$5,000.00 per applicant per year.

340	Cover Crop	ac
-----	------------	----

- ❑ An incentive of \$15/acre will be paid for a maximum of 3 years over the life of the EQIP contract.
- ❑ Management will be according to practice standard.
- ❑ The incentive is capped at \$3,750.00 per applicant per year.

589C	Cross Wind Trap Strips	ac
------	------------------------	----

- ❑ Minimum strip width is 15 feet.
- ❑ Must establish a permanent warm season grass trap strip for one time payment of \$200 per acre.
- ❑ Practice must be maintained for the life of the contract.

554	Drainage Water Management	ac
-----	---------------------------	----

- ❑ An incentive payment of \$40/acre per year for up to 3 years on acres being managed.
- ❑ Incentive payments for this practice are capped at \$2000.00 per applicant per year.

647	Early Successional Habitat Development - Management	ac
-----	--	----

- ❑ A \$15/acre incentive per year for up to 3 years for land managed by strip disking, strip spraying and prescribed burning.
- ❑ One time \$250/acre per tract payment for woodland edge feathering.
- ❑ Maximum of 100 acres of any combination.

449	Irrigation Water Management	ac
-----	-----------------------------	----

- ❑ Incentive payment of \$3/ac for land under irrigation.
- ❑ Management must decrease non-point source pollution of surface or ground water resources.
- ❑ Incentive provided only for existing irrigation systems.
- ❑ Incentive payments for this practice are capped at \$300.00 per applicant per year.

590	Nutrient Management	ac
<ul style="list-style-type: none"> <input type="checkbox"/> A \$5/acre incentive payment may be paid for up to 3 years. <input type="checkbox"/> Eligible land must not currently be under a nutrient management plan. <input type="checkbox"/> Incentive payments for this practice are capped at \$1,250.00 per applicant per year. <input type="checkbox"/> Clients who have received nutrient management payments under a previous EQIP contract are not eligible for this incentive payment. <input type="checkbox"/> Incentive payments for Nutrient Management (590) and Waste Utilization (633) can not be received on the same acres in the same contract year. <input type="checkbox"/> The Nutrient Management Plan must be developed prior to the practice application. 		
595	Pest Management	Ac
<ul style="list-style-type: none"> <input type="checkbox"/> An incentive payment of \$4/acre for up to three years if tied to the application of Residue Management – No Till (329) and/or Residue Management – Mulch Till (Indiana Modified No-Till) (345), or is within the drainage area of a WASCOB. <input type="checkbox"/> Eligible land must not currently be under a pest management plan. <input type="checkbox"/> Incentive payments for this practice are capped at \$1,000.00 per applicant per year. <input type="checkbox"/> Clients who have received pest management payments under a previous EQIP contract are not eligible for this incentive payment. <input type="checkbox"/> The Pest Management Plan must be developed prior to the practice application. 		
528	Prescribed Grazing	Ac
<ul style="list-style-type: none"> <input type="checkbox"/> Incentive payment of \$10/acre for up to three years. <input type="checkbox"/> Incentive payment is made during the first 3 years of the contract. <input type="checkbox"/> Cost share payments will also be available for other practices required as part of the plan. <input type="checkbox"/> Incentive payments for this practice are capped at \$1,250.00 per applicant per year. 		
329	Residue and Tillage Management - No-till/Strip-till/Direct Seed	ac
<ul style="list-style-type: none"> <input type="checkbox"/> Incentive payment of \$20/acre for up to 3 years. <input type="checkbox"/> A STIR rating of less than 10 must be documented to receive this incentive. <input type="checkbox"/> This practice must be applied to the same acres all 3 years in which the incentive payments are made. <input type="checkbox"/> Incentive payments for this practice are capped at a total of \$5,000 per applicant per year. <input type="checkbox"/> Clients who have received no-till incentive payments under a previous EQIP contract are not eligible for this incentive payment. <input type="checkbox"/> Applicant must have no-tilled for less than 5 consecutive years in order to be eligible (based on the 2006 Indiana 329 Practice Standard). <input type="checkbox"/> The rotation for the contract period must include at least two years of no-till corn. <input type="checkbox"/> Must also implement nutrient management (590) and pest management (595) the fall prior to the implementation of no-till. This action is taken for the purpose of addressing issues that may limit the success of no-till implementation. 		

<ul style="list-style-type: none"> ❑ Incentive payments will be provided for nutrient management and pest management practices as well if requirements are met. 		
345	Residue and Tillage Management – Mulch Till (Modified No Till)	ac
<ul style="list-style-type: none"> ❑ Incentive payment of \$8/acre for up to 3 years. ❑ A STIR rating of less than 20 must be documented to receive this incentive. ❑ This practice must be applied to the same acres all 3 years in which the incentive payments are made. ❑ Incentive payments for this practice are capped at a total of \$2,000 per applicant per year. ❑ Clients who have received mulch-till incentive payments under a previous EQIP contract are not eligible for this incentive payment. ❑ Applicant must have mulch tilled (modified no till) for less than 5 consecutive years in order to be eligible. ❑ The rotation for the contract period must include at least two years of corn. ❑ Must also implement nutrient management (590) and pest management (595) the fall prior to the implementation of the mulch till system. This action is taken for the purpose of addressing issues that may limit the success of mulch till implementation. Incentive payments will be provided for these practices as well. ❑ Practice must meet the Indiana 345 practice standard for modified no-till / high end mulch till system. 		
472	Use Exclusion	ac
<ul style="list-style-type: none"> ❑ Incentive payment of \$250/acre for excluding livestock from streams or wetlands or woodlands (10 acres protected maximum). ❑ Area protected is composed of minimum 30 ft distance to water in the case of streams, measured from barrier to waters edge. ❑ In the case of wetlands, the area protected is the portion of wetland protected by exclusion present on the tract. ❑ Incentive to be used for livestock exclusion only, livestock must be present in protected area to qualify. 		
633	Waste Utilization (Soil Test \leq 50 ppm)	ac
<ul style="list-style-type: none"> ❑ Crop fields where animal wastes are being utilized: a \$30/acre incentive payment may be paid for up to 3 years. ❑ The applicant can be the person whose farm is generating the waste or the person receiving the waste. ❑ The applicant must have control of the fields that are to receive the waste during the contract. ❑ Eligible land must not currently be under a nutrient management plan. ❑ The incentive is capped at \$7,500 per applicant per year. ❑ Criteria for the incentive are tied to the fields that will receive the manure. ❑ Only fields with a soil test phosphorus level of <50 ppm (100 lbs) per are will be eligible. ❑ Pre-sidedress soil nitrate test (PSNT) must be completed on land receiving manure. 		

<ul style="list-style-type: none"> ❑ Soil test must have been completed within the last 4 years to be valid. The number of acres necessary for manure application should be based on the IDEM "Manure Application Land Requirements." ❑ Incentive payments for Nutrient Management (590) and Waste Utilization (633) can not be received on the same acres in the same contract year. ❑ The Waste Utilization Plan must be developed prior to the practice application. 		
644	Wetland Wildlife Habitat Management	ac
<ul style="list-style-type: none"> ❑ Incentive payment of \$20/acre for up to three years to manage area for wetland wildlife. ❑ Practices installed under this contract will be cost shared at rates established for practices installed. ❑ Maximum of 25 acres per applicant per year. 		

NOTE: Special Cost-share & incentive provisions are in place for the following practices:

313 Waste Storage Facilities:

1. A Comprehensive Nutrient Management Plan (100) is required to be eligible for cost share for this practice (313).
2. The Comprehensive Nutrient Management Plan (CNMP) must be completed (written, approved and delivered to the applicant) prior to the start of the waste storage facility.
3. When implemented to solve an existing resource concern on an existing facility site with less than 20% expansion of the Animal Units within the same species, costshare will be 50% (AM) up to the capped amount. In all other situations, costshare will be 20% up to the capped amount.
