

Natural Resources Conservation Service Conservation Practice Standard 412, Grassed Waterways requires that all grassed waterways be constructed and seeded between March 1st and September 30th. All landowners who intend to construct and seed a grassed waterway outside of these dates must agree to the following:

The landowner is fully responsible for failure of waterways as a result of construction and seeding outside of the seeding dates.

The landowner agrees to repair or reconstruct all waterways that fail due to construction and seeding outside of the seeding dates.

The landowner takes full financial responsibility for all repair or reconstruction costs. The Natural Resources Conservation Service and the Farm Services Agency are not responsible for full or partial payment for any failure associated with seeding outside of the seeding dates.

I certify that I have read and agree to the above:

Landowner: _____
(PRINT NAME)

(SIGNATURE) **Date:** _____

This form shall be filed as part of the landowner's conservation plan.
